

Custom Shed Builders

Shed Windows and More has been supplying the 'Do It Yourself' community for decades with quality construction materials for their outdoor building construction projects. We had been asked so many times over the years why we weren't building outdoor buildings with the quality we deliver in our products. Fast forward to 2020 and we decided to work with some of our top builders to create custom outdoor buildings built to your specifications in your backyard!

We are a company you have counted on for years for top quality building products for your outdoor buildings. We are bringing that same eye to detail, experience, track record, and workmanship to our outdoor buildings construction business. Whether you want a new garage, garden shed, chicken coop, a dog kennel, barn, horse barn, playhouse, office shed, guest shed, or other outdoor structure we are

the company that can provide a quality product at a price that can't be beat for what we deliver.

The beauty of what we provide at Custom Shed Builders is an unbeatable product, built right in your backyard. We help you translate your dreams of a new outdoor building, garage, barn, chicken coop, playhouse, or dog kennel into a finished product that meets your specifications and needs.

We have a simple quote, design, and build process. We have a conversation about what your needs are, the goals for your new outdoor building, and then we create a building plan and quote to make that dream into a reality. Our custom-built sheds are not packaged sheds. The custom shed we will build on your property is a custom structure built to your specifications to match the look and feel of your home so it adds to the curb appeal

of your property and your new outdoor building can raise your property value. We combine workmanship with the highest quality construction materials to deliver a building with style and durability.

From golf cart garages to horse barns, we've got you covered. We love what we do and it shows in our finished projects. We take your ideas and dreams and translate them into practical, functional, durable, and beautiful outdoor buildings. Just

think of what a little added space away from the main house could do for your family. Think remote schooling, home office, or a place to have relatives or friends come and stay. How about that garden shed you've always wanted? Make a wish list and we can make it happen!
