SECURITY

Security Vision & Alarm.com

Residential - Commercial - Builder Solutions

Imagine a home that proactively automates routines for the entire family, a small business that is protected and receives helpful Business Activity Analytics, and a custom program for builders. With Security Vision, an Alarm.com authorized service provider, this is a reality.

Alarm.com delivers solutions for homes and businesses around the world to manage, control, and secure their property from anywhere through video, access control, intelligent automation, energy management, and wellness offerings.

Residential

Smarter home security is expertly installed, customized for the home, and controllable from anywhere. Automate the home with smart locks, temperature control,

video monitoring, lights and shades, water protection, fire and carbon monoxide safety, and solar monitoring.

New smart home solutions this year include the new Smart Thermostat HD, now available in white and black, to match any home aesthetic, and provides a top-of-the-line thermostat with a sleek, premium touchscreen with easy installation and energy savings. The battery-powered, 780 Video

Doorbell is perfect for any door where there is no working chime. It increases installation flexibility while providing the same Two-Way audio, expansive Field of View, and powerful Alarm.com People Detection, so customers can do more at the front door.

Small Business and Commercial

Alarm.com for Business introduced new commercial offerings including the expanded line of Pro Series commercial-grade Power Over Ethernet (PoE) cameras, Third-Party Camera Support, and additional solutions for Access Control. The growing ecosystem of commercial products works together seamlessly to enhance and upgrade any small business or commercial security system.

Homebuilders

Security Vision can customize a builder package as part of the Alarm.com Builder Program. This makes it easy for homebuilders to outfit new communities. Benefits include an intelligent platform designed around a cost-effective hardware package, tools to manage model homes and any vacant inventory, and self-guided home tours that give home shoppers more flexibility.

For further information or to discuss your upcoming Whole House Automation project or any of your Security needs, call Security Vision Of Myrtle Beach @ (843) 839-4238, email Info@SecurityVisionMB.com or visit SecurityVisionMB.com. You can also see the bottom of page 18 of this Special Issue for further information.
